

correlation = 0.29264  
p = 0.0126

Scatter plot showing the relationship between GDP per capita (PPP) on the x-axis and Life expectancy at birth (2010) on the y-axis for 140 countries. The plot includes a red regression line and a gray shaded confidence interval. The correlation coefficient is 0.29264 and the p-value is 0.0126. Countries are labeled with their three-letter codes.

correlation = 0.85416  
p < 0.0001

Scatter plot showing the relationship between the number of international flights (log scale) and the number of international tourists (log scale) for various countries. The plot includes a red regression line and a grey shaded confidence interval. The correlation is 0.85416 and p < 0.0001. Countries are labeled with their three-letter codes.
